

VIO-LC · input default · conditional median ATE with acceptance flags

Metric stereo / inertial: SE(3)

ok/planned = numerical outcomes. A3: clean accepted N=3; B: blocked; L: limited; F: observed failure; M: missing; U: unreviewed.

R: config rerun; X: nonzero exit; P: coverage <95%; K: keyframes. Separate cohorts are not pooled.

Failures/missing slots stay in counts. Agricultural reference issues remain; aligned GNSS scores are not global error.

EuRoC AirSLAM VIO/VIO-LC: corrected runs4-6; affected runs1-3 retained in the historical-cohort CSV.
